PROFILE

As a forward-thinking entrepreneur and technology enthusiast, I have a

strong foundation in business management, data analysis, and innovation. My experience in digital marketing, project management, and e-commerce has equipped me with the skills to drive impactful projects. With a growing interest in quantum computing and its applications, I am eager to contribute to cutting-edge government projects in this field. My ability to analyze complex data, manage projects, and innovate makes me a valuable asset to any team working on quantum technology initiatives.

EMPLOYMENT HISTORY

****Founder & CEO, AGK Enterprises, Maharashtra****

****May 2020 – Present****

- Established AGK Enterprises, registered under GST, and expanded operations to e-commerce platforms like Amazon and Flipkart.
- Gained hands-on experience in inventory management, compliance, and business strategy.
- Temporarily paused e-commerce operations in 2022 due to limited investment but gained valuable insights into scalable business models.

PROJECT PROPOSAL FOR QUANTUM COMPUTING

As part of my application for the government project on quantum computing, I propose leveraging my skills in data analysis, business strategy, and innovation to contribute to the development of quantum algorithms and their applications in real-world scenarios. My experience in managing AGK Enterprises and analyzing market opportunities will enable me to identify practical use cases for quantum technology in industries like e-commerce, logistics, and finance.
